

PORTAL FS

INSECTICIDE

USPENSION CONCENTRATE FOR THE TREATMENT OF SEEDS (FS)

Reg. No. L8934

Registration Holder: ANASAC SOUTH AFRICA PTY., LTD

Country: SOUTH AFRICA

GUARANTEED COMPOSITION:

Active ingredient:

IMIDACLOPRID 233 g/L
TEBUCONAZOLE 13 g/L

GENERAL

PORTAL FS a seed dressing containing a systemic insecticide for the control of Russian aphid and a fungicide for the control of stinking smut and loose smut in irrigated and Winter Rainfall Region wheat.

RECOMMENDATIONS FOR USE

CROP	PEST and DISEASE	DOSAGE RATE
WHEAT Winter Rainfall Region Irrigated Wheat	Russian Aphid (<i>Diuraphis noxia</i>) Loose Smut (<i>Ustilago tritici</i>) Stinking Smut (<i>Tilletia</i> species)	200 mL per 1L water per 100 kg seed.

METHODS OF APPLICATION

Sure equipment and nozzles are in good condition and calibrated for a good distribution and uniform droplet size. Before applying the caliber product with water spray equipment to verify that you are applying the correct dose.

MIXING

Verify the correct calibration of the equipment before starting the application. Put water halfway applicator device tank, add the required amount of the product according to the recommended dose in this label, keeping the agitator running and complete with the remaining volume of water. We recommend adding a non-ionic adjuvant to improve coverage.

COMPATIBILITY: **PORTAL FS** has not been tested in combination with other seed dressing treatments.

RE-ENTRY TO THE AREA TREATED:

WITHHOLDING PERIOD: Allow a minimum of 100 days between planting treated wheat seed and feeding or grazing.

WARNINGS FOR USE
